

FIG. 221.—Section from the same area as in Fig. 220, cutting the muscle fibers in cross section, showing small bubbles of gas within the fibers and small collections of gas around them. This picture shows the leucocytic reaction secondary to trauma, produced by the positive chemotaxis which occurs when the anaerobic bacteria are few. At the right of the figure is a small foreign body (black). Accession number 4707, Army Medical Museum. Negative number 45898. Hematoxylin and eosin stain; $\times 220$
